

Sheffield United Football Club

- £16.6m value
- Completed 2008
- New south west corner for Bramall Lane and 8 storey hotel
- Geo-environmental, civil and structural engineering

3e has worked with GMI Construction on two projects at **Sheffield United's Bramall Lane** ground: a new south west corner stand and immediately adjacent a new four star hotel.

The new **SW corner stand** added 2000 seats to Bramall Lane with **unrestricted views for spectators** following the removal of intermediate columns. This work was completed in 2006.

The **four star, eight storey** Copthorne Hotel in Sheffield opened in 2008. It is built alongside the new SW corner stand and provides **158 bedrooms** as well as conference facilities, restaurants, bars and state of the art fitness suites.

3e provided geodesign services for these design and build projects.
