

Aldi Stores, Across North East England

- Framework Agreement
- ongoing project
- Average of 10 extensions and 5 new builds per year
- Geo-environmental, civil and structural engineering

3e is appointed within a **framework agreement** with Aldi stores to provide engineering services for new or extended stores throughout North East England.

This has seen 3e work on an average of 10 extensions and 5 new builds per year since 2006 throughout a region stretching from the **Scottish Borders down to North Derbyshire**.

3e's work on these projects includes structural design, civil engineering design – including highway works, geotechnical engineering and **attenuation analysis** where required. Construction techniques include load bearing pre cast concrete walls with timber trusses and **steel framed structures**.

The framework also includes **mixed use schemes** such as retail units attached to the Aldi stores, a Travel Lodge Hotel above the Aldi store in Middlesbrough, and stores with industrial/work units alongside.
